

LYSTA

Company profile

Lysta A/S was founded in 1970 and is situated 25km north of Copenhagen. Lysta is a small medico-company with a large and varied network of business partners and sub-suppliers.

Lysta manufactures high-technology products with the emphasis on the dental branch. This is an area in which Lysta has been breaking new ground with respect to new technology and design for many years.

The company's machine shop contains advanced machinery, capable of manufacturing high precision electronics and optics. Therefore, Lysta, together with its network partners, is able to undertake both large and small production orders.

Lysta's products can be tailored to the customers' requirements. In addition to these products, Lysta markets other unique products that are complementary to Lysta's own product programme.

As far as quality assurance is concerned, Lysta lives up to the requirements of such standards as ISO and GMP.

Lysta A/S trades with end-users, dealers, state and municipal institutions and industry. Besides supplying the Danish

market, Lysta exports approximately 50% of its total production.

Designed on the basis of the slogan: *Smallest dimensions and weight; best performance; best possible hygiene and reliability.*

The unit is intended for domiciliary dental care and can, in principle, be operated anywhere in the world where the temperature is over +5°C. It can be used to carry out all types of modern dental treatment. The unit is supplied with electricity from the mains (100 – 240V) and there is a 24VDC input option (battery supply) which can be customised to meet the needs of the user.
