- [SME & Business Development](#) »
- [Technology Transfer](#) »
- [Vocational Education and Training](#)
- [Centre for Policy and Business Analysis](#)

The FP7 Project Office

Why FP7?

Since the beginning of 2007, a FP7 project office has been established in order, for DTI, to supply a coordinated and consistent support to the Centres that wish to participate in European Union funded research projects.

The new FP7 office draws on the extensive experience held within DTI's International Centre regarding management and handling of large international research and development projects.

DTI has an interest in all the above themes with special focus on Health, KBBE, ICT, NMP, Energy and Transport.

The IDEAS programme aims at supporting basic research through the European Research Council (ERC) while the PEOPLE programme runs the Marie Curie research training and mobility activities. The CAPACITIES Programme aims at building European research infrastructure and sharing of knowledge. Special emphasis is put on support to SMEs, an area of special relevance to the activities at DTI.
